

1. Open Windows Defender Firewall settings on your computer and create a new outbound rule to block all traffic from the Spotify desktop app.

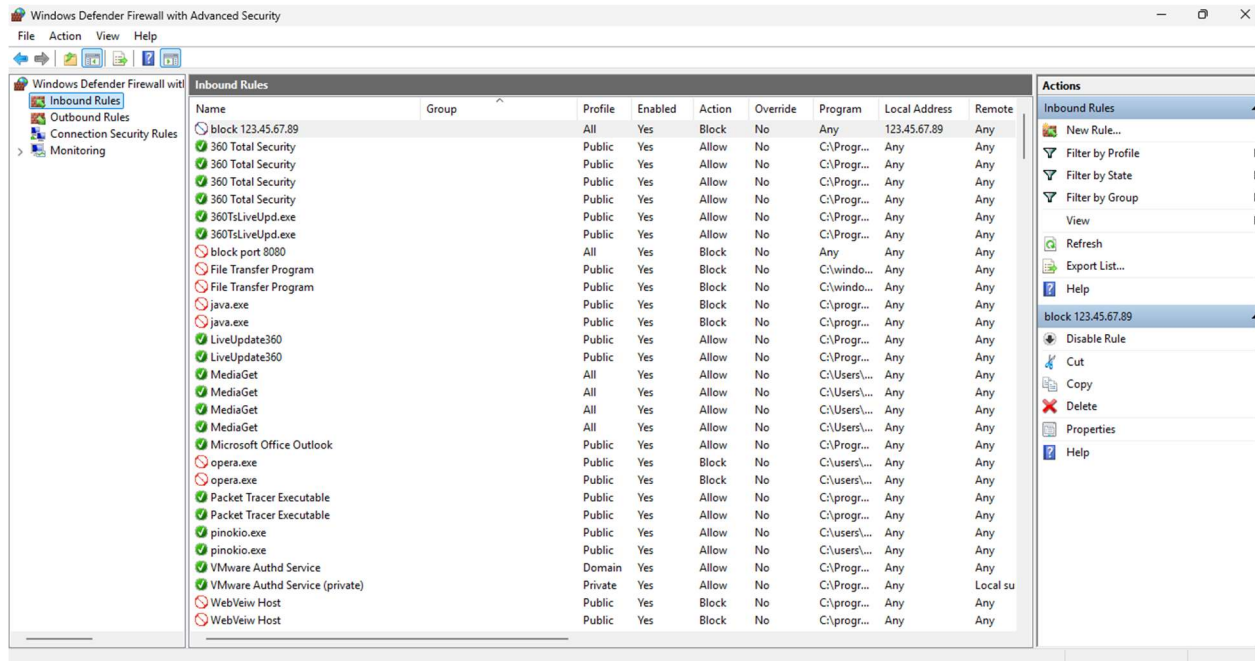

2. Set up an inbound rule in Windows Defender Firewall to allow incoming connections only for Google Chrome on port 443 (HTTPS).

3.Document, step-by-step, how you would block all traffic from a specific IP address (for example, 123.45.67.89) using Windows Defender Firewall.

Hint: Use the 'Scope' tab when creating a new rule to specify the IP address.

4. Compare hardware firewalls (like those used in large offices) and software firewalls (like Windows Defender) by listing 3 key differences and a use case for each.

Feature	Hardware Firewall	Software Firewall
Location	Separate physical device	Installed on a computer
Protection	Protects many devices on a network	Mainly protects one computer
Performance	Can handle large amounts of network traffic	Uses the computer's resources
Example	Firewall used in a large office	Windows Defender Firewall
Use Case	Best for large offices and companies	Best for home users and individual PCs
